Linkdin/juber khan | github/juberkb | housing board, shastri nagar, jaipur, rajasthan, India (302016)

I am a ReactJS frontend developer with 1.5+ years of working experience, also 7 months of internship and 1.2 year exp in QA. I have hands-on experience with the MERN stack (MongoDB, Express, React, Node.js) and MS SQL Database. My background in software testing helps me deliver reliable and user- focused web applications.

PROJECTJS

b2b-Ecom :

Built a dynamic B2B e-commerce platform using React.js with all essential pages and functionalities.

TechHub :

Developed a full-stack tech coaching platform using React.js, Node.js, and MSSQL with dynamic course

Tech-ai :

Create A Iplatform using Gemini and ChatGPT APIs for image,text processing, voice-to-text, and text-to-voice features.

The-FV-Association :

Developed a React-based frontend for managing tasks in the fresh market vegetable wholesaler association.

WE-WON :

Developeda rich, interactive user interface for the WE-WON web platform using React.js.

Rent A Car:

Designed anddeveloped a responsive UI for a Rent A Car web platform using React.js, focusing on seamless user experience

SKILL

- React
- Reactjs
- Javascript
- Nodejs
- Express js
- MSSQl
- MongoDb
- CSS
- HTML
- Zustand
- Chakra-Ui
- GitHub
- Postman
- Excel

EDUCATION

BACHELOR OFTECHNOLOGY (B.TECH), COMPUTER SCIENCE

AryaCollege of engineeringandIT,jaipur

2017 - 2021 RTU(Kota)

WORK EXPERIENCE

Webvixa Software Private Limited

Mern Stack Developer — **Oct 2024- Working**

Full-Stack Web Application (MSSQL + Google Cloud Storage) :

Redesigned and migrated a legacy desktop application into a scalable, full-featured web platform using ReactJS (frontend) and Node.js (backend). Implemented multi-admin user management with secure authentication flows including register, login, forgot password, edit profile, and password update. Integrated MSSQL for robust data handling and Google Cloud Storage for asset management (images, PDFs), with dynamic, folder-wise data access based on user credentials. Built a hybrid data-fetching system to support both new (cloud) and legacy (server) content, ensuring smooth transition and backward compatibility. Developed an intelligent image processing module that splits large images, creates album-style layouts, and displays media securely through password-protected views.

Wedding Services Platform (Frontend Only) :

Led frontend development of a dynamic, multi-form wedding services platform using ReactJS, with responsive and reusable UI components for optimal performance across all devices. Implemented Zustand for efficient global state management, enabling seamless user data flow across complex, multi-step forms. Designed URL-based dynamic routing to serve customized forms based on user types such as bride/groom, photographer, or planner. Built smart entry detection and IP-based geolocation to tailor form flow, auto-set country codes, and deliver location-specific content.

Tech-Hub MERN Stack Coaching Platform (with MSSQL) :

Built a dynamic full-stack web application for a tech coaching institute using the MERN stack with MSSQL, featuring secure admin and student panels with login, session tracking, and data filtering. Developed dynamic pages for course listings, schedules, and user management to streamline operations and enhance user experience.

GRRAS Solutions Pvt. Ltd.

Frontend Reactjs Developer — **Dec 2023- Sept 2024**

- Revamped the company's product website using React.js, enhancing overall
- performance and user experience.
- Translated design mockups into responsive, cross-browser compatible user interfaces.
- Optimized UX and reduced bundle size through efficient coding practices and
- streamlined API design.

Magic Edtech

Accessibility & Manual Web Testing Engineer — **Dec 2021- Aug 2023**

Experienced in ADA, Section 508, and WCAG 2.0/2.1 compliance testing. Proficient in creating accessibility test scenarios, using screen readers (JAWS, NVDA, VoiceOver), identifying issues, recommending fixes, and preparing VPAT and compliance reports. Skilled in manual web testing, including UI/UX validation, cross-browser testing, responsive design checks, functional testing, and bug reporting using tools like Jira.
